Installing the Expansion Box

Please note that this product does NOT support hot-plug feature by means of the Expansion Cable. You can NOT connect or disconnect the expansion cable unless you power off your system first.

1. Turn OFF the system power before installation!

Since both the PC system and the Expansion Box are self-powered, you need to follow the correct ON/OFF sequence as follows:

- **Power Off Sequence:** Power off your PC system then the Expansion Box
- **Power On Sequence:** Power on the Expansion Box first, then power on your PC system.

2. Remove the chassis cover from your computer

3. Locate an unused PCI Express slot (typically white and smaller) and remove the corresponding slot cover from computer chassis.
4. Plug the PCIe add-in card to the unused PCI Express expansion slot and attached its card bracket to the computer chassis screw.
5. Put the chassis cover back on the computer.
6. Install one end of the Expansion Cable to PCIe add-in card's connector and the other end to the Expansion Box's.

Warning!! Since the Expansion Cable's connector has the same form factor as the standard DVI connector, however, their signals are different; please do NOT connect the Expansion Cable to neither your LCD monitor nor your Video Graphic cards.

7. Then we are installing the PCI add-in cards in the Expansion Box: ❶ Open the top cover (by removing the screws) of the Expansion Box, there are 4 PCI slots in the Expansion Box. ❷ Find an unused slot, remove the "blank" PCI card bracket that was pre-installed from the factory. ❸ Plug in your PCI add-in card (s). ❹ Put the top cover back on your Expansion Box.

8. Connect the AC power Adapter's cable to the Expansion Box.
9. Turn on the Expansion Box power by means of its power switch next to the Expansion Cable, then power on the PC system.
10. Proceed with Software Driver Installation if required.

Installing the ExpressBooster Software

In some cases, if the write performance of your PCI Card is not good. Please install the ExpressBooster software supplied with your card.

1. To install the software, find the **setup.exe** file in the following folder on the driver CD: (assume your CD is in the drive E:), double click the file to run the setup.

E:\Utility\ExpressBooster

2. Follow the setup on-screen instructions, you will be asked to **check the “PCI Express Card”** item (leave the **“Express Card”** item un-checked). Then proceed with the rest on-screen instructions to complete the installation.
